Self-Evaluation Report

ANNEX 10

Department of Veterinary Sciences

University of Pisa

EAEVE, 2022

Annex 10. Number of attendees to continuing education courses provided by the VEE

Academic Year 2018-2019

Courses	Attendees
<i>Study day on antibiotic resistance: One-health to the test</i>	34
<i>Study day on paratuberculosis</i>	34
<i>The new system of official controls: regulation (EU) 2017/625</i>	78
<i>Gastroenterology cases to discuss together</i>	50
<i>Hepatopathy you have, therapy you find</i>	100
<i>Viral enteritis of sheep and goats</i>	9
<i>Management and health of small ruminant breeding</i>	9
<i>Management of bovine reproduction</i>	9
<i>Veterinary pharmacosurveillance and use of the drug in minor species</i>	9
<i>Intensive poultry farming systems and techniques</i>	9
<i>Epidemiology and prophylaxis of rabies</i>	9
<i>Pig farming management and health</i>	9
<i>Herpetic infections of small ruminants</i>	9
<i>Prion diseases in animals</i>	9
<i>Embryo transfer in horses and cattle</i>	9
<i>Small scale farmers: global and local strategies. An urban and peri-urban poultry farming project in Burkina Faso</i>	9
<i>Introduction to voluntary certification</i>	20
<i>Self-branding</i>	20
<i>Official control activities at the slaughterhouses of domestic ungulates</i>	20
<i>Organisation and functions of the IZS Lazio and Tuscany: activities of the Pisa office</i>	20
<i>Official control activities on fishery products</i>	20
<i>Labeling of fishery products</i>	20
<i>Alternatives to the use of additives in the processing industry</i>	20
<i>Ritual slaughter</i>	20
<i>Statistical bases applied to food inspection - Part 1</i>	20
<i>Statistical bases applied to food inspection - Part 2</i>	20
<i>PIF/UVAC official control activities</i>	20
<i>Official controls at the disembarkation points</i>	20
<i>Official controls in the bivalve mollusc supply chain</i>	20
<i>Morphological and organoleptic characteristics of macromycetes: notions of systematics and nomenclature</i>	20

<i>The automatic distribution of food and drinks</i>	20
<i>The surveillance systems of diseases transmitted by mushroom consumption: sector regulations and mycological inspectorates of the Regional Health Service</i>	20
<i>Search for histamine in fishery products</i>	20
<i>Application of predictive microbiology and challenge tests on products of animal origin</i>	20
<i>Official control of the honey supply chain</i>	20
<i>Good beekeeping practices in beehive management</i>	20
<i>The management of food safety guarantees in honey production</i>	20
<i>The Veterinarian today: perspectives in Italy and abroad</i>	61

Academic Year 2019-2020

Courses	Attendees
<i>Study day: The specialisations are told: training paths in the field of food inspection and veterinary public health (on-line course)</i>	34
<i>Path on self-branding: reputation (on-line course)</i>	44
<i>Path on self-branding: effective negotiation mechanisms (on-line course)</i>	44
<i>Path on self-branding: practical applications (on-line course)</i>	44
<i>Idiopathic cystitis and bacterial cystitis</i>	85
<i>One world One health: an integrated approach to zoonosis and neoplastic diseases</i>	90
<i>Control of gastrointestinal parasites of ruminants and equidae</i>	19
<i>Fasciolosis in ruminants and humans</i>	19
<i>The importance of the feed mill in preventing the presence of aflatoxins in food chains of zootechnical origin</i>	19
<i>Parasitosis and bacterial diseases of the bee superorganism and application of the RPV</i>	19
<i>New methods of coproparasitological diagnosis</i>	19
<i>Clostridiosis</i>	19
<i>Contagious ecthyma</i>	19
<i>Animal coronaviruses: a fascinating biological labyrinth</i>	19
<i>Norovirus infections</i>	19
<i>Principles and applications of risk analysis in animal health</i>	19
<i>Hygienic guarantee of bivalve molluscs: the new challenges for the public veterinary service</i>	10
<i>Health problems in farmed fish species: environmental and consumer protection</i>	10
<i>Chemical risk assessment: emerging problems</i>	10
<i>Identification of species in imported fish products: the experience of the FishLab</i>	10
<i>Food safety</i>	29
<i>Epidemiology and risk analysis</i>	29
<i>Public health and organisation in the Experimental Zooprophyllactic Institutes</i>	29

<i>Health and hygiene aspects and beekeeping products</i>	29
<i>Biological and chemical risks</i>	29
<i>Animal welfare</i>	29
<i>International cooperation</i>	29
<i>Dairy products</i>	29
<i>The Veterinarian today: perspectives in Italy and abroad</i>	41
<i>Studies on feline reproduction and endocrinology at SLU</i>	41

Academic Year 2020-2021

Courses	Attendees
<i>Management aspects of prevention in Veterinary Public Health and Food Safety (on-line course)</i>	30
<i>A weekend with AKI: understanding and treating acute renal failure</i>	85
<i>Animal welfare: a transdisciplinary challenge in Veterinary Medicine</i>	190
<i>Examples of veterinary epidemiology applied to public health and animal health</i>	10
<i>Check list and animal-based assessment of ruminants</i>	10
<i>Principles and applications of risk analysis in animal health</i>	10
<i>African trypanosomiasis: aspects of animal health and the role of veterinary cooperation in the fight against tropical diseases</i>	10
<i>Environmental risk assessment of veterinary medicinal products</i>	10
<i>Molecular techniques applied to food inspection</i>	10
<i>Costs for prevention in a veterinary public health and food safety functional unit</i>	20
<i>The costs of food safety: the meat supply chain</i>	20
<i>Costs and benefits of food safety in private companies</i>	20
<i>Methodological approaches to the control of infectious diseases in developing countries: the example of foot-and-mouth disease</i>	20
<i>Environmental presence of veterinary medicines</i>	20
<i>Sustainable animal production between climate change and new responsibilities: the future is green</i>	50
<i>The veterinarian in modern beekeeping</i>	42
<i>Dietetics in pets</i>	42
<i>Unconventional animals</i>	42
<i>Communication in Veterinary Medicine</i>	42
<i>The management of the puppy from the first visit to vaccination</i>	42
<i>The Veterinarian today: perspectives in Italy and abroad</i>	42
<i>New evolutionary paths for agro-zootechnical companies</i>	35
